Subject: RE: [naep] University Loft

Michael:

The University of Southern Indiana has been using University Loft for at least ten years and we purchased the environmental wood the first year that Loft offered it. We have not had any problems with the products and it has stood up to our students. Without looking it up to be precise, I would say we have bought in excess of 4 million dollars worth of product from University Loft. They have always done what they tell us they will do and have stood behind their products. I would highly recommend them!!!

If you have any additional questions, please feel free to give me a call or email.

Best wishes,

David Goldenberg, M.B.A., CSCS
