ENDLESS POSSIBILITIES

THE TOOL-LESS SYSTEM™

The Tool-Less System™ allows you to quickly go from one height to the next without the use of tools. Simply choose between the 11 height settings, place the spring or bedrail over steel dowels, and tap with hand into place to lock, and, with our steel bunking pins, quickly loft your bed into endless configurations.

BED FEATURES

University Loft Company is proud to present a solid wood, modular design and Tool-Less Bed System™. The Graduate Series offers residents unique options to optimize space, storage, and function to meet any need.

3"X3" BED POST

WHY SAFETY?

Our bed end is constructed with several safety features. First, the post is 3" x 3", offering greater surface to surface contact for improved sturdiness. Additionally, the bed end features four spreader rails that meet federal safety regulations and leads the industry in durability.

BED SHELF
10305
32.875"W x 10.75"D x 9.375"H

PASSING THE TEST

In an independent lab test, EFT tested stronger than Northern Red Oak, and the results were measured in newtons as force, in which the meter showed LB/FT to demonstrate the force needed to pull a screw from the wood. EFT broke at 160 lbs. of pressure, while Northern Red Oak snapped at under 140 lbs. of pressure. This test proves that EFT is in fact stronger, more durable, and able to withstand the rigors of extreme use without breaking down. Just look at this bunk bed hold up under the 4 tons of a cargo container placed on top of it.

BUILT TO LAST

100% solid wood equals great value. This product has a 30 year life and is the best in on-campus housing available today with solid wood drawers, sides, and fronts. High-pressure laminate tops allow for very heavy-duty use. These tops have a 10 year warranty which can be upgraded to 25 years.

A BETTER OPTION

It is the responsibility of all mankind to be good stewards of our planet, and at University Loft Company we take that very seriously. Our furniture is made from Environmentally Farmed Timber ensuring the natural beauty of the forest is preserved for all to enjoy. Independent lab studies have shown our farmed timber to be stronger than Northern Red Oak. We work with both Malaysian Timber Certification Council and the Forest Stewardship Council to ensure that we're not adding to the deforestation of our planet. Since 1994, over 1200 colleges and universities have gone green by partnering with University Loft Company.

This demonstrates the sustainability of this natural resource. Although many logging companies are using forestry management practices now, which is a good start, it only includes planting 6 oak seedling trees for every one cut down. This provides an argument for those practicing this, that there are more trees than ever. Yet, it will still take at least 60 years for one of these trees to reach a harvestable diameter. In this time, 3 full-sized HB trees could be harvested and ready for production. This is the best way to sustain a wood supply for continued furniture production without depleting the world's forests.

SERIES FEATURES

The Calla Series is named after the Calla Lily and the Greek word meaning “most beautiful.” It comes in three attractive laminate options which follow the latest color trends. The series features several add-ons that can further enhance the product. Pull out shelves can be added to the 3-drawer chest, mobile pedestal, and desk as extra work space. Casters can also be added to provide the greatest flexibility to allow students to customize space.

- Built for modularity, so all pieces can be swapped in and out and work together cohesively.
- Add more work space by upgrading desks, mobile peds, and chests with a pull out tray.
- Drawers feature metal drawer side panels with integrated heavy-duty slides. Drawer fronts are recessed into the side panels.
- All six sides use construction grade laminate to ensure the highest quality, finished inside and out for a clean look throughout.

BUILT DIFFERENTLY

Each piece is constructed with steel frames along the bottom and 45lb. density industrial grade laminate. The high-pressure laminate tops meet the demanding needs of student housing environment with gator ply backer and 2mm edge banding. In addition, the drawer boxes are constructed with additional metal bracketing, giving the furniture exceptional durability.

UPTOWN

SERIES

THE UPTOWN SERIES

The Uptown series is designed to maximize durability while creating a contemporary, clean look. Multiple color options allow you to customize your furniture to perfectly compliment your property's aesthetic. Product highlights include ball bearing drawer glides, high pressure laminate tops, and recycled steel frames.

Manufactured from metal and laminate, this line stands up to the harsh demands of student housing, yet provides a stylish setting that creates an inviting environment. All products shown here are available with various laminate and metal finish options. Our furniture specialists are available to work with you in planning which look is best for your space.

BEDROOM
